IMPORTANT INFORMATION

You have received this notification because construction is due to start in your neighborhood.

You will shortly see crews from Aspire Communications in your street carrying out important work to lay fiber infrastructure that will digitally future-proof Simi Valley for generations to come. We are confident residents will realize the long-term benefits of this privately funded, superfast fiber network in their community for generations to come.

What will we be doing?

With a microtrenching machine we will cut a thin shallow trench in the roadway close to the curb, where we will lay the fiber conduit. We will then refill the trench and reinstate the road.

How long will construction last in my street?

We aim to be past your home in just one day. You may see us again at a later date removing utility markings the rain has not washed off.

If you have any questions regarding the construction of the FiberCity® project, contact us
